

## Check List

**P.O.W.D.E.R.Y** - Vehicle safety checks and legal requirements any questions about the vehicle controls plus mentioned any extras such as ABS

1. **P**etrol – ensure sufficient fuel for journey.
2. **O**il – ensure oil, brake fluid, PAS fluid(if visible) are within the required levels
3. **W**ater – ensure sufficient coolant, washer fluid
4. **D**amage – ensure there is no damage to car, don't move if illegal.
5. **E**lectrics – ensure all electrics are working
6. **R**ubber – ensure the tyres are legal (tread depth, cuts bulges) also wiper blades
7. **Y**ou – Very important that you are fully rested and without hangover etc, there are more accidents caused by tired drivers than drunk drivers

Cockpit drill – ensure Client carries one out and that it includes instrument checks ask if any questions about the vehicle controls and mention any extras such as ABS. Look for a “moving brake” test once on the move, BUT ensure its carried out at a safe place.

## Key factors to look for

1. Use of speed
2. Separation distance
3. MSM PSL & IPSGA
4. Forward planning
5. Other road users
6. Driver attitude
7. Legal requirements
8. Passenger safety
9. Vehicle sympathy
10. Dealing with aggressive drivers
11. Environmental effects
